As with all software releases, Windows 8 1 comes with a few bugs One that has been annoying many people since updating to 8.. If you have the recent version of Word (with the stupid ribbon menus), go to File, Options, and then in the dialog box, click 'Advanced' on the left.. However, the option is disabled by default, and is the culprit behind the problem.. 1 is the display settings Users have been describing bold, blurry (fuzzy) and hard-to-read fonts in several applications.
