slave's sword [REDACTED] walkthrough #6

One of the worst games i ever played, better invest your money in something else than this meme of a game, this game has eventually a bitcoin miner running in the background while you have this game open. this game is developing work of like 10 minutes.. Such a disappointment... I bought a new PC for this game and I will be playing X3AP with Litcube universe again.... When comes out for Mac?. I played for 67 minutes and I think I've been through everything the game has to offer. Not exactly value for money and it seems like development is over so it won't get any better.. Great game and good fun. A little short and the challenges could be a little more difficult (or have more), but overall really enjoyable for the \$5 price tag. The sandbox mode is a little buggy. I am trying to see if I can max out the damage bar in sandbox, but too many weapons cause framerate issues and the dummy freezes midair or sometimes leaves the play area altogether. If you like ragdoll games and just want some fun and waste a little time, pick this up.. IT SAYS IT IS MULTIPLAYER! IT LIES I WANT TO PLAY WITH MY FRIENDS AND I CAN'T!!!. Best MXGP game so far +++++

Blackfaun is too early for access. It looks like it will eventually be a decent rogue like. As it stands now, it is overly unclear what is happening (why am I picking up different colored hearts?, what does a candle do?, etc) and it has some game breaking bugs. Example: After stage one my weapon disappears and I get spammed with error messages. This is not a one time occurrence. It happens every time.

I look forward to changing my review when some of the major issues get resolved.. very fun. would love some more tutorials. i am a noob.. this is so gruesome and dark
i love it so much

I've been passionate about alchemy since a very young age cause of FullMetal Alchemist and when I heard of this game I was like "Why isn't it on my library yet?" And you should ask yourself that too cause this is a very badass game , and if you like gore , mystery and a 11/10 story , you've come to the right place .

Thought I gotta tell you , this is that type of a game where it's all about that gRIIIINNNDDDD , and it might take you a while to finish it, tho trust me , it's all worth it .

All I am worried about is the fact that once I finish it I won't intend to play it again cause of how long it takes to finish it :<
Oh and did I forget to tell you that when you kill your daughters , they make sounds and you can hear them getting killed , I love it lol .. I enjoy text based adventure like these and this is another well done story.. TL:DR;
This game is so horribly imbalanced to the point, where it is insulting BS. Also, no resolution change.

Review:

A promise of something, that could be a fantastic game, a survival against the cold, harsh alien world.
We definitely need games like that, incorporating resource management, skill progression and turn based combat.

Unfortunately this game isn't it.

I will skip graphics and audio part. Graphics is 800x600 and attempts to switch to full screen will make this game unplayable.
Audio is stock, but doesn't annoy.

The real problem with this game is gameplay.
Apparently, this game was not play-tested, or if it was, it was playtested by someone with a wicked sense of cruelty.

You see, this title is one, total RNG bull\2665\2665\2665\2665.
There is no difficulty setting - each and every game will see you fucked right up in the back end of your gastric system.

Of course, challenging games can be fun, but in 'Link' this isn't even challenging.
Let me show you what I mean.

The rescue mission, lowest difficulty. Survivor starts at the exact opposite end of the map. Your guys rush to them, only to run out of stamina (it regenerates 1 point of stamina per turn, so if you have 5 max, you need 5 turns to regenerate it to max).
You move your survivor towards rescue party.
What happens? Lowest mob moves towards your survivor and kills it with two hits.
Amazing. Or perhaps survivor spawned with a sniper rifle, in which case it may be the only character to survive, whereas your rescue crew will be gangbang'd by 3 spiders.

Seriously, there is no difficulty progression. Base attacks, the very first one, will pitch your tiny group of soldiers against a horde of 8-12 aliens, many of which will be top tier units capable of killing your soldier with ONE hit.

Honestly? What was supposed to be a challenging fun, was revealed to be frustrating RNG hell.

What else? Generic loot, limited skill choice and upgrades (for example you can only research one of four techs per branch, characters are limited to like 5 skills).

Constantly growing threat level, even if all you do is just farming for food.

Constantly dropping heat and stamina levels, heat drops even when a soldier sleeps (wtf?).

This crap is really not worth playing. I say this with a heavy heart because I had expectations for this title.

Unfortunately, this one is not a game to be lightly tossed aside. It is a game to be thrown away with great force - and with regret.. I am going to be completely honest here.

Long time no see, ISI's original baby.

The game itself is quite the simulator you'd need. FFB is not hard to set-up and it's all controller friendly.

Sure, you'll find some toxic people, but that's why leagues exist.

The game itself has no content, but makes up for it with thousands of mods.

Overall, rFactor is a game that never gets old. Buy it, it's worth even 13 years after the release.. If you don't have high expectations on a Megaman game this might be for you. It's not a bad game, but it also isn't a good one in my opinion. I requested a refund..

Pretty cool game, although at some points in the game things seem almost impossible, it is doable.

Love the art on this game, especially on the short cutscene's.. <https://youtu.be/uSt-XitZzwQ>

Individual tastes may vary, even for a ?joke? premise such as this. A single end game choice hardly provides any player agency for those not pushed away at the initial setting.
